Date: 9/17/2014	Time: 15:35	
Duty Officer/Responder Name: Gregor	NRC Report #: 1095526	Hotline Log DataID: 1648039
<b>Action Information</b>		
<b>Description:</b> Duty officer followed up with ConEd Environmental Response Team. Source of release was found today and the feeder line was clamped; release was secured. The dielectric fluid is non-PCB cable feeder oil and was sampled for PCBs. PCB levels were less than 1ppm, which is "non-PCB containing." Some of the soil near the leak was saturated with oil. Quantity released is estimated based on computer modeling and it did not appear to be as much as was estimated (although a more accurate estimate could not be provided). Cleanup and remediation of the leaked oil is in progress.
